

Triana Science & Technology offers to the customers a complete range of services. Our quality factors in crystallization are between the highest of Europe. Triana Science & Technology is ready to assume new challenge in the protein, small molecules and drug crystallization fields offering to our customers:

- Professionalism
- Fast response
- Guarantee
- Security
- Confidentiality

Triana Science & Technology is in conditions to guarantee the results, to the point that if we do not obtain the required crystal, we do not charge the service.

▣ Crystallization

Triana Science & Technology offers a wide variety of crystallization services. Protein, drug and small molecules.

▣ Tailor-made Crystals

We grow tailor-made crystals of high purity for different applications.

▣ Structural Crystallography

Triana Science & Technology solves crystal structure of proteins, drugs and small molecules.

▣ Logistic Support

Triana Science & Technology offers logistic support for crystallisation space experiments.
